

# Mark Scheme (Results)

Summer 2023

Pearson Edexcel International Advanced  
Subsidiary Level In Physics (WPH16)

Paper 01

Unit 6: Practical Skills in Physics II

Question Number	Answer	Mark
1(a)	<p><b>EITHER</b></p> <p>Measure time (1)</p> <p>For a known volume (of water to flow out of the tube) (1)</p> <p>Use (volume flow rate =) <math>\frac{\text{volume}}{\text{time}}</math> (1)</p> <p><b>OR</b></p> <p>Measure volume (of water to flow out of the tube) (1)</p> <p>For a known time (1)</p> <p>Use (volume flow rate =) <math>\frac{\text{volume}}{\text{time}}</math> (1)</p>	3
1(b)	<p>Uses number of divisions <math>\times</math> 50 ms per division (1)</p> <p>Use of <math>f = \frac{1}{T}</math> (1)</p> <p><math>f = 6.3</math> Hz Accept 6.25 Hz (1)</p> <p><u>Example of calculation</u></p> <p>Number of divisions = 6.4</p> <p>Time for <math>2T = 6.4</math> divisions <math>\times 50 \times 10^{-3}\text{s} = 0.32</math> s</p> <p><math>T = \frac{0.32\text{s}}{2} = 0.16</math> s</p> <p><math>f = \frac{1}{0.16\text{s}} = 6.25</math> Hz</p>	3
1(c)	<p>Measure the flow rate and frequency (at the same <math>h</math>) (1)</p> <p>Repeat for different values of <math>h</math> (1)</p> <p>Plot a graph of flow rate against <math>f</math> (1)</p>	3
1(d)	<p>The data logger can be used remotely (without monitoring) (1)</p> <p>The data logger can record measurements over a long period of time</p> <p><b>Or</b></p> <p>The data logger can record a large amount of data (1)</p>	2
<b>Total for question 1</b>		<b>11</b>

Question Number	Answer	Mark
2(a)	<p>Any <b>TWO</b> from</p> <p>Do not point source towards the body (1)</p> <p>Keep a safe distance from the source (1)</p> <p>Use the source for as short a time as possible (1)</p> <p>Handle with tongs (1)</p> <p>[Ignore answers relating to PPE, shielding and storage]</p>	2
2(b)(i)	<p><b>EITHER</b></p> <p><math>\ln C = \ln C_0 - \mu x</math> (1)</p> <p>Compares with <math>y = c + mx</math> where <math>-\mu</math> is the gradient which is constant (1)</p> <p>MP2 dependent on MP1</p> <p><b>OR</b></p> <p><math>\ln C = -\mu x + \ln C_0</math> (1)</p> <p>Compares with <math>y = mx + c</math> where <math>-\mu</math> is the gradient which is constant (1)</p> <p>MP2 dependent on MP1</p>	2
2(b)(ii)	<ol style="list-style-type: none"> <li>1. Measure thickness of <math>x</math> with a micrometer (1)</li> <li>2. Record the count (rate) <math>C</math> over a long period of time (1)</li> <li>3. Obtain count (rate) <math>C</math> for at least 5 different values of thickness <math>x</math>. (1)</li> <li>4. Keep the distance between the source and detector constant (1)</li> </ol> <p>Any <b>TWO</b> from:</p> <ol style="list-style-type: none"> <li>5. Record thickness <math>x</math> in several places and calculate a mean (1)</li> <li>6. Check and correct for zero error (on the micrometer) (1)</li> <li>7. Record the background count (rate) <b>and</b> subtract from the count (rate) <math>C</math> (1)</li> </ol>	6
